

Setup Windows XP Mode

For internal training only www.latiffesa.com

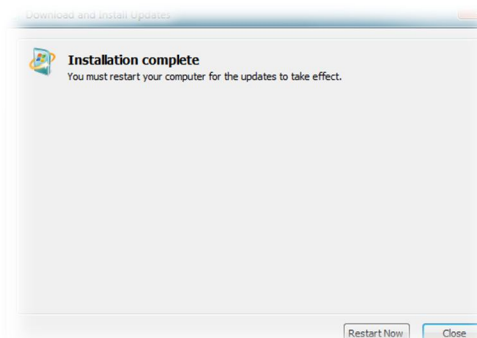

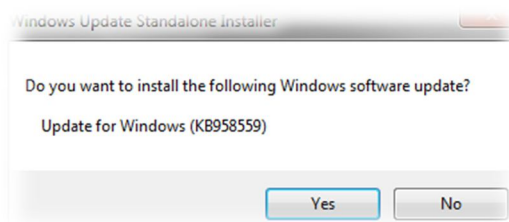

The following illustrates the installation of Windows XP Mode. My PC is using the 64 bit Windows 7 Professional version. The XP mode is only available on Windows 7 Professional and higher versions. The name of the file being downloaded might be different depending on your version of Windows 7.

1. Access this url <http://www.microsoft.com/windows/virtual-pc/download.aspx>
 - Download Windows XP mode
 - Download Virtual PC
 - Download XP Mode update

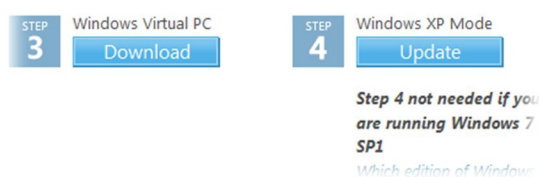

2. Install Windows XP mode. Double click **WindowsXPMode_en-us** file to install. Click **Next | Next | Finish**.

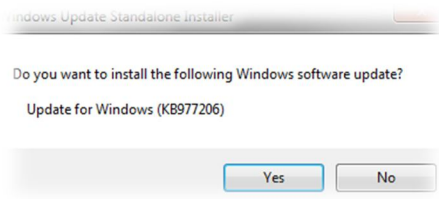

3. Install Virtual PC. Double click **Windows6.1-KB958559-x64** file to install. Click **Yes | I accept | Restart Now**.

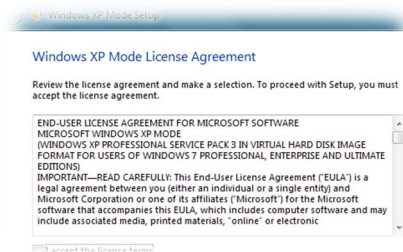

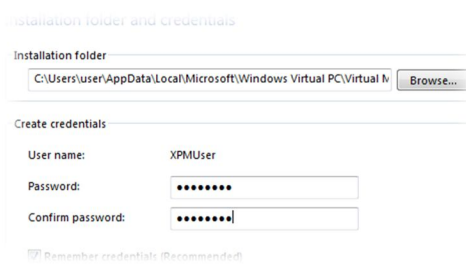

4. After the reboot access the url Access this url <http://www.microsoft.com/windows/virtual-pc/download.aspx> again and click on **Update**. This download is about 4 Mb.

5. Install the update. Double click on **Windows6.1-KB977206-x64**. Click **Yes**. Once completed click on **Restart Now**.

6. After the reboot, click **Start | All Programs | Windows Virtual PC | Windows XP Mode**. Select **I accept the license term |**.

7. Key in your **password** and click **Next**.

8. Select **help protect my computer by turning on automatic update now**. Click **Next** and click **Start Setup**.

9. Once completed you will have your Windows XP running side by side with Windows 7 to support the legacy applications and hardware drivers.
